| **How does this software improve the efficiency with which a practice operates?** | | The fully integrated RevFlow web-based practice management system is designed by therapists for therapists. From patient records and scheduling to billing management, this system is designed to help every facet of a practice run smoothly. The company strives to provide practices with guidance and training to help owners achieve their business goals. | Casamba's solutions improve operational and administrative efficiency, streamline documentation, enhance compliance, and optimize billing, enabling facilities across the entire therapy continuum of care to capture, exchange, and analyze data. | Clinicient Insight is a single-system EMR/billing platform designed to help outpatient therapy practices optimize their clinical and financial operations. It does this through a combination of cloud-based EMR, practice management, billing, and revenue cycle management solutions. By combining process automation technologies and data-driven coaching, Clinicient can help practices improve efficiency, increase revenue, and minimize time-to-collect. |
